GZS3202

Direct textile & Dye sublimation printer

A wide range of applications solution!

With continuous ink recirculation and robust repairable construction, **Dimatix Starfire 1024** print head delivers unparalleled saturation, smooth gradient and vibrant colors.

EnTek recirculation solution!

GZ Negative pressure recirculation system with Japanese components, peristaltic pumps and degassing modules eliminate gasses and bubbles ensure stable sublimation transfer printing.

Special drying system for textile printing!

Poster heater and cooling fans dry the ink on the media back right after printing, prevents the media back from ink contamination.

Industrial stability and high speed!

Robust printer body, CNC aluminum beam and dual linear guides assure high speed, high resolution textile printing.

Multifunction feeding & taking up system!

Constant tension devices plus pneumatic core shaft feeding & taking up systems ensure stable and precise transportation for different kinds of media.

Intelligent printing table design!

With detachable printing table design customers can freely switch the platen for paper transfer and the slot for textile. Close pinch rollers reduce media wrinkle.
